"A curriculum must transform a teacher, before it transforms students." According to a multitude of research, the instructor is the paramount factor in the success of any program and this is why we ensure that teachers go through our 3 day Mindset Mastery Teacher Institute where their own personal and professional lives are transformed by experiencing our modules just as students would. This full immersion experience allows teachers to experience the benefits for themselves in real time so that a deep sense of commitment, conviction, and enthusiasm is fostered that will translate into the consistent and passionate delivery of these lessons!
